

Recycling is a major factor here at Mor-Dale Farms! During your fieldtrip you will learn about all of the practices the Moyer's use to be good stewards of the land and keep their animals comfortable.

Contact us today to customize your next fieldtrip!

Your students will learn about where milk comes from, how sustainable practices are used on an operating dairy farm and why it's important to include dairy in your diet.

Location:

Our tours meet several PA State Education Standards and Career Education and Work Standards.

Contact us today to customize a fieldtrip that will allow your students to learn in a fun new environment.

SEE FIRST-HAND WHERE YOUR MILK COMES FROM

MOR-DALE FARMS

Technology, recycling, sustainability and cow comfort all come together on this state of the art dairy farm and we invite you to come and learn what it's all about.

**Cow Power
In Action!**

Those who tour Mor-Dale Farms will have the opportunity to see how water, heat and manure are recycled on the farm and how technology is used to milk, feed and groom the cows.

Some of the things you'll see on the farm include:

- Four Robotic Milker Units
- A Methane Digester and Covered Lagoon Water Filtration System
- An Automatic Feed Pusher
- Automatic Grooming Brushes

Different Options for Different Ages

Choose from a variety of age appropriate activities:

- ◆ Make butter in a jar
- ◆ *Mini Milk Maids on the Moove*
- ◆ Make ice cream in a bag
- ◆ Recycling scavenger hunt or bingo
- ◆ Real vs. Imitation experiment
- ◆ Try flavored milk steamers or other milk activity
- ◆ Cow feed to Cow Power—a true recycling process
- ◆ Make compost flower pots

*Activities subject to change.
Contact us to customize your fieldtrip experience.*
